SITUATION SUMMARY

Hurricanes' Iselle and Julio, Hawaii, Pacific Ocean (New)

Hurricane Iselle is approximately 830 miles east of Hilo, Hawaii and is moving west-northwest with maximum sustained winds of 100 mph. Hurricane force winds extend outward up to 35 miles and Tropical Storm Force (TS) winds extend outward up to 155 miles from the storm center. The outer winds may reach the easternmost Hawaiian Islands by early Thursday afternoon. A Tropical Storm Watch is in effect for Hawaii County (population 185,079) and Maui County, (pop. 154,834) Hawaii. The National Hurricane Center reports Hurricane Iselle has weakened to a Category 2 Hurricane and is expected to continue weakening and may become a Tropical Storm as it makes landfall in Hawaii within the next 48 hours. Hurricane JULIO is located approximately 1,750 miles east of the Hawaiian Islands and is moving west-northwest at 17 mph with maximum sustained winds of 75 mph with higher gusts. Hurricane force winds extend outward up to 15 miles and TS force winds extend outward up to 105 miles from the storm center. Hurricane Julio is forecast to make landfall less than 72 hours after Hurricane Iselle. The National Hurricane Center reports Tropical Storm Julio has strengthened to a Category 1 Hurricane.

Potential Impacts:

Winds of 45-55 mph with higher gusts in the valleys and passes; surf up to 12 feet; 5-8 inches of rain for Hawaii and Maui Counties and 4-7 inches for Oahu, with locally higher totals for windward sections; flash flooding; and coastal inundation.

Critical Information:

- The FEMA Region IX Incident Management Assistance Team-1 has deployed to HI.
- There are no requests for FEMA assistance.
- There have been no Urban Search and Rescue (US&R) activated or put on stand by.
- EMSA expects that one CA Disaster Medical Assistance Team (DMAT) will be put on stand by but has not occurred yet.
- The National Infrastructure Coordinating Center reports no known/reported impacts to national critical infrastructure.
- There have been no EMAC requests from Hawaii.
- The Red Cross will have an ESF6 rep attached to the RIX IMAT on the island and has also established a Disaster Relief Operation on the island.
- No California Power Mutual Aid is anticipated.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA:

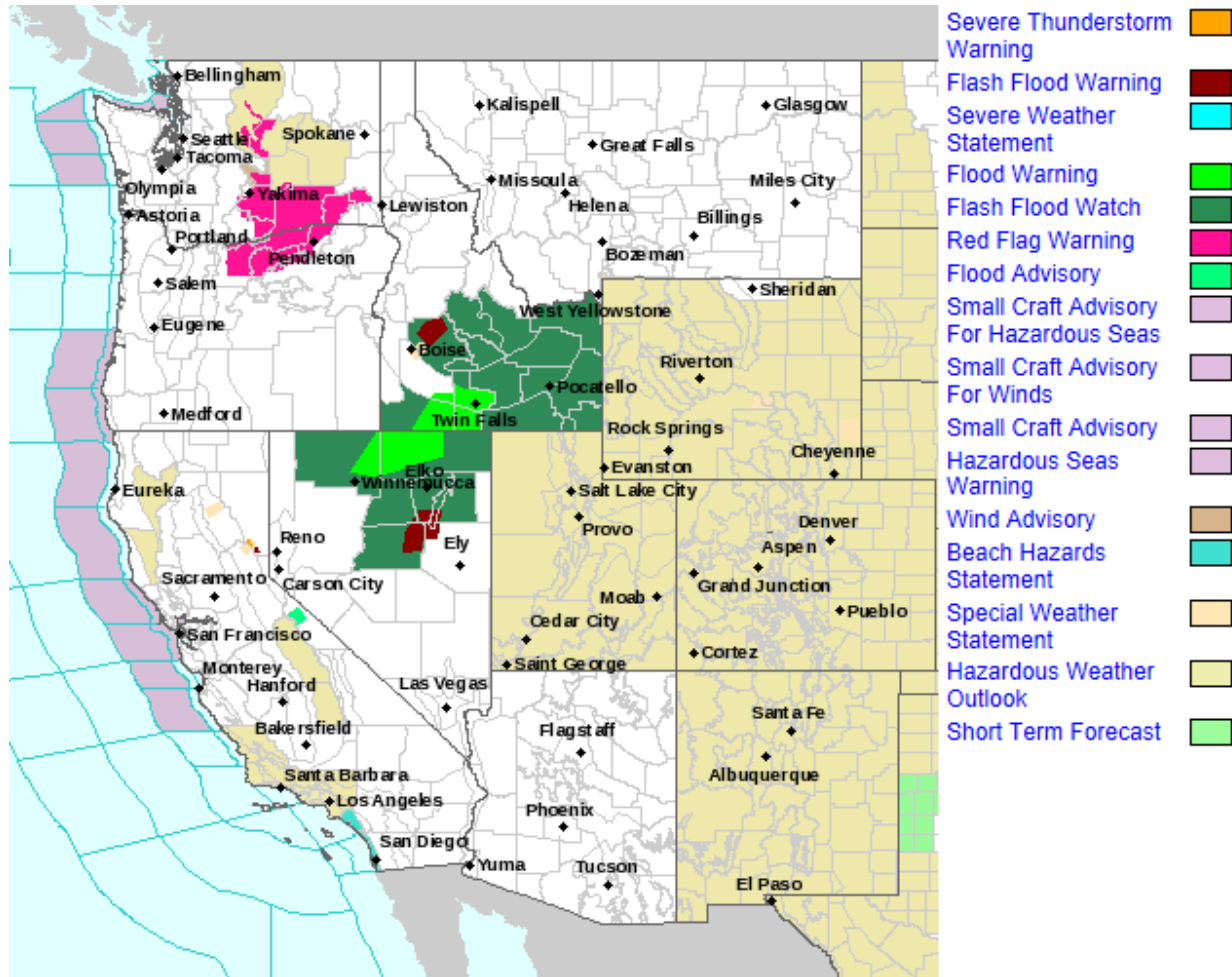

A slow moving low pressure system will continue to keep a band of cloudiness and some showers northeast to southwest across portions of Northern California today from the Bay Area to the Warners. There will continue to be some isolated afternoon and evening thunderstorms, particularly near and north, of the northern portion cloud band where mostly sunny conditions can prevail. However, western Siskiyou County looks like a least-likely area for thunderstorms today. Some thunderstorms are likely to produce locally heavy rain for possible flash floods. Higher pressure will put in a brief appearance Thursday, but a slight chance of isolated afternoon and evening mountain thunderstorms will continue. A weak low pressure trough will move into the region Friday and linger near the coast through Monday. The chance of daily, isolated afternoon and evening mountain thunderstorms will also continue through Monday. A drier northwest flow will probably arrive next Tuesday and Wednesday. Temperatures today will still generally be below normal today. The rest of the week through the weekend will be near normal for this time of year with the warmest inland valleys right around 100. Patchy morning valley fog is possible for the next few days in areas that received quite a bit of rain. The marine layer will remain in place along the coast with low clouds and patchy fog, but it will be somewhat less deep than it has been.

SOUTHERN CALIFORNIA:

The upper level low over Northern California will drop slightly further south today, which will cause a slight increase in shower and thunderstorm coverage in the Sierras. During the afternoon, scattered convection can be expected from Fresno County northward along the Sierra chain. Most of the storms will remain in the higher elevations above 8,000 feet. In addition, showers and one or two thunderstorms will be possible along the central coast region. Most of the precipitation will occur in Monterey and San Benito County, but even there, only very light precipitation amounts are likely. Elsewhere, mostly sunny skies with light winds will prevail. Temperatures will range from the upper 70s in the mountains above 5,000 feet to the lower 90s in the valley and up to 105 in the deserts. Minimum relative humidity will reach the 15-25% range over many areas away from the marine layer. Thursday and Friday, the upper level system will move out of the area and only some cumulus and one or two thunderstorms can be expected in the Sierras and the far northern part of Inyo County. Temperatures will change little through the end of the week. This weekend, southerly flow may redevelop over the area, leading to slightly warmer temperatures and an increase in afternoon relative humidity. Another surge of subtropical moisture may reach the Cleveland, eastern San Bernardino and the deserts by next Monday or Tuesday, leading to scattered wet thunderstorms in these areas. No strong winds or abnormally hot temperatures are expected during the next 7 days.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 3rd: Don Pedro 44%; Exchequer 20%; Folsom Lake 41%; Lake Oroville 35%; Millerton Lake 52%; New Melones 26%; Pine Flat 13%; San Luis 22%; Lake Shasta 34%; Trinity Lake 35%; Pyramid Lake 93%; and Castaic Lake 47%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml
- W21: Water in the 21st Century Legislation Introduced: California Sens. Barbara Boxer and Dianne Feinstein along with their House colleagues Reps. Grace Napolitano (D-CA-32) and Peter DeFazio (D-OR) introduced legislation to promote water conservation and recycling on Thursday, July 31. The identical House and Senate bills, entitled "W21: Water in the 21st Century," expand rebates and grants for water conservation and efficiency; support local investments in water recycling and improved groundwater management and storage; invest in research into water-saving technologies and desalination; and establish an open water data system.

Closed Cal OES Missions

- **2014-LAW-4649**, On 8/5/2014 at 1840 hours, the International Emergency Response Coordination Center (IERCC) advised of a SPOT-Connect-"SOS" activation near Big McGee Lake in Mono County. IERCC advised they had attempted but were unable to contact the listed emergency contact. LDO contacted Mono County Sheriff's Department and relayed the information. Mono County said they would deploy a ground team and check with California Highway Patrol (CHP) for the availability of their helicopter. The LDO contacted the listed emergency contact and learned his 67 year old father and two of his friends in their 60's had planned a five day trip in the back country. The group had no medical issues and it was believed if the SPOT had been activated, it was a legitimate emergency. Their itinerary was forwarded onto the Mono County Sheriff's SAR Coordinator. Mono County Sheriff's Department advised CHP helicopter was unable to respond and their ground team had deployed with ETA of reaching the victim to be at 0200 hours, 8/6/2014. LDO attempted to locate another helicopter within region and adjacent regions but were met with negative results. At 1951 hours, LDO contacted AFRCC and requested a hoist capable helicopter that could operate at an elevation of 10,500 ft. plus. At 2038 hours, China Lake Naval Base SAR helicopter, VX31, accepted the mission. Update: At 2320 hours, Mono County Sheriff's Department advised the victim had been airlifted off the mountain and was being transferred to an ambulance to be taken to Mammoth Hospital. The victim had suffered a moderate injury to his leg after a fall. The other men in the victim's party was to hike out on their own the next morning. LDO updated IERCC and confirmed the device had been deactivated and was no longer sounding. LDO updated AFRCC. **Mission Closed.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
